

演講題目

# Logic NVM and its Application in IoT Era

## Autobiography

Dr. Shen was appointed as President of eMemory Technology in October 2009. He supervises the company's technology development migration from 0.7um to 16nm. His management won eMemory the reputation of the most efficient and reliable logic NVM partner in the world, and his effort was crucial to the company's success in becoming the leader in the embedded NVM IP industry.

Dr. Shen received his doctoral degree in Electrical Engineering from National Tsing-Hua University (NTHU). He holds over 120 worldwide patents and published more than 30 technical papers. He is one of inventors in eMemory proprietary NVM technology portfolios. He is also one of the major contributors as an author of the book titled "Logic Non-Volatile Memory" and served as technical committee member at "International Conference on Solid State Devices and Materials (SSDM)" and "IEEE International Conference on Integrated Circuit Design and Technology (ICICDT)".
