SEMINAR

Quantum computation and quantum information

管希聖 教授
台灣大學物理學系

In this talk, Dr. Hsi-Sheng Goan will present the basic ideas and recent developments in the field of quantum computation and quantum information. In particular, he will describe the performance of some quantum algorithms, the concept of quantum teleportation and the applications of secure quantum communication.

時間: 2:20pm, December 20, 2013

地點: Room 215, 台達館

吳玉書 教授
Ext. 62184
